### **CIMA ENERGY LP**

Founded in 1996, CIMA is a full-service oil and gas marketing and producer services company headquartered in Houston, TX. CIMA has a nationwide presence in the U.S. and in Canada as a wholly owned subsidiary of Mitsubishi Corporation. CIMA has established a well-earned reputation over the past 26 years as one of the most reliable and respected oil and gas mid-market firms in North America.

CIMA offers an integrated suite of services customized to meet specific customer needs, including Producer Services and Support, Natural Gas Marketing, Crude Oil Marketing, Financial Trading, Supply and Asset Management for Industrial Users, Division Order and Royalty Interest Administration, and Transportation and Storage.

We have a proven track record of delivering expertise, support, reliable service and access to opportunities for producers, royalty owners and energy buyers in North America.

We are currently expanding into Decarbonization Services, to provide environmental commodities services such as Renewable Natural Gas (RNG),

Responsibly Sourced Natural Gas (RSG), Carbon Credits, etc.

We are right-sized for your success. A company with over \$4 billion in annual sales and more than 125 employees in seven regional offices, we combine big-company market access, stability, and services with the personal attention that simplifies and improves day-to-day business.

Our financial and credit strength through our parent company Mitsubishi Corporation and a banking consortium position, makes CIMA one of the most trusted providers in oil and gas marketing and producer services.

Regional presence in key market areas allows CIMA to provide natural gas services and expertise to customers coast to coast. Our personal, local approach enhanced by industry wide understanding and financial fortitude—further contributes to your success.

### **WHEELER POWER SYSTEMS**

Wheeler Power Systems provides complete hybrid and cogeneration energy systems featuring Caterpillar gas and diesel engine generators; energy conversion and storage systems; renewable energy systems including solar arrays; and power distribution switchgear, controls and advanced monitoring systems.

Our team of experienced professionals works closely with owners and engineers to design reliable and resilient power systems, improve overall system performance, decrease fuel and maintenance expenses, reduce emissions, and minimize the total cost of energy by applying the best technical solution for each operating environment.

### **ENERGY STRATEGIES**

Founded in 1986, Energy Strategies provides comprehensive services, including strategic energy consulting, energy procurement, energy project analysis and development, public policy and regulatory services. We deliver value by

## 2023 UAE Conference Sponsors

enhancing our clients' ability to profit in complex energy markets.

Our understanding of energy markets is broad and deep. That understanding affords clients the luxury of addressing energy-related decisions with confidence. Clients use our professional services to supplement in-house energy resources, or as a comprehensive, turnkey resource.

Energy Strategies' client base includes industrial, commercial and educational customers, trade associations, power producers and multi-national manufacturers. The list includes companies such as Chevron, Monsanto, Phelps Dodge, Mid American Energy, Calpine and Motorola. Public sector clients include San Diego State University, Arizona State University, Harvard, Michigan State University, Cornell University, Utah State University and many others. Many of our client relationships have endured since 1986.

### **HEXCEL CORPORATION**

Hexcel Corporation is a leading advanced composites company that manufactures and markets lightweight, high-performance structural materials, including carbon fibers, reinforcements for composites, prepregs, honeycomb, matrix systems, adhesives and composite structures, used in commercial aerospace, space and defense and industrial applications.

Hexcel offers an unmatched breadth and depth of products and services to the composites industry. It manufactures the full spectrum of advanced material solutions including everything from fiber to fabrics and resin formulation to thermosetting prepregs, new solutions for out of autoclave processing, molding materials, composite tooling, honeycomb and machined core. As a complete composites solutions provider, it is able to vertically integrate its quality products through all phases of its customers' needs.

With such an expansive portfolio, Hexcel's product lines are applied across a variety of markets which spurs a constant drive for innovation and cost-competitive production.

This culture of innovation allows it to embrace the exploration of new ideas, to challenge the impossible and succeed beyond expectations to support and anticipate customer requirements. Hexcel has been a pioneer at the forefront of the Composites industry for 75 years and will continue to pave the way for the future.

### **HOLLAND & HART**

Throughout the Mountain West, from coast to coast and beyond, Holland & Hart provides clients with astute legal service from a vantage like no other. We help energy consumers, developers, and public utilities achieve greater agency over their business goals through affordable, reliable, and diversely sourced energy.

Our attorneys work at the forefront of public utility policy, guiding the way from inception of a generation or transmission project through the regulatory approval and ratemaking process. Complexity comes with this territory. State, federal, and FERC public utility regulatory proceedings, including rate case and tariff hearings, adjudicatory, rulemaking, and show cause and complaint proceedings all require sound counsel. We also represent clients in arbitration hearings, settlements, contract negotiations, and in appeals and other court proceedings.

Holland & Hart clients include large commercial and industrial enterprises that band together to influence regulatory measures and reduce energy costs statewide; independent power producers developing large-scale renewable energy projects; and transmission line developers interested in expanding the western region's electric power grid.

For more information, visit [hollandhart.com](http://hollandhart.com).

### **HUNT ELECTRIC**

Hunt Electric is a full-service electrical, sustainable, technology, and infrastructure contractor providing turnkey services throughout all markets. Founded in 1986 in Salt Lake City, Hunt Electric offers our services in four offices, including St. George, Denver, and Boise. Our

## 2023 UAE Conference Sponsors

services include design, installation, and maintenance for EV chargers, solar module systems, high voltage substations and transmission lines, all commercial and industrial electrical services, and more. With eight in-house divisions, we can provide turnkey solutions with a single point of accountability.

### **INTERMOUNTAIN HEALTH**

Intermountain Healthcare is a Utah-based, not-for-profit system of 33 hospitals (includes "virtual" hospital), a Medical Group with more than 3,800 physicians and advanced practice clinicians at about 385 clinics, a health plans division called SelectHealth, and other health services. Helping people live the healthiest lives possible, Intermountain is widely recognized as a leader in clinical quality improvement and efficient healthcare delivery. For more information about Intermountain, visit [intermountainhealthcare.org](http://intermountainhealthcare.org)

### **JAMES DODGE RUSSELL & STEPHENS, P.C.**

JDR&S is a small, specialized Salt Lake City-based law firm specializing in complex energy, administrative and commercial litigation and business matters. The firm represents numerous local and national clients in matters involving complicated economic, factual and legal issues. Its lawyers appear in federal and state courts and administrative agencies throughout Utah, the Western United States, and the country.

The firm's attorneys have significant experience and expertise in all aspects of utility law and commercial litigation. It provides energy and utility-related legal services to a number of municipal energy providers, large commercial and industrial clients, and municipalities and agencies in various energy-related matters, including general litigation, general rate cases, contract negotiations to support renewable energy goals, negotiations for special contracts, and other related regulatory and litigation matters. It also provides litigation and business services to a

variety of local and national entities on a wide range of matters. Attorneys at JDR&S have achieved high scholastic honors, significant commercial law experience and expertise, and the highest possible ratings for competence and ethics.

### **NORTHROP GRUMMAN**

Northrop Grumman is a technology company, focused on global security and human discovery. Our pioneering solutions equip our customers with capabilities they need to connect, advance and protect the U.S. and its allies. Driven by a shared purpose to solve our customers' toughest problems, our 90,000 employees define possible every day.

### **ROCKY MOUNTAIN POWER**

Rocky Mountain Power is committed to powering our customers' lives with the most sustainable, reliable and affordable energy possible. We're not just your utility, we're your neighbors. We thrive along with you in delivering services, Wattsmart solutions and long-term partnerships that will help keep our skies clear and our communities strong and safe places to live and work.

### **UTAH OFFICE OF ENERGY DEVELOPMENT**

The Office of Energy Development is committed to advancing Utah's energy and minerals economies for the provision of affordable, reliable, and sustainable outcomes that provide significant and lasting value to the state.

### **UTAH STATE UNIVERSITY FACILITIES DEPARTMENT**

Utah State University was established in 1888 under the Morrill Land-Grant Colleges Act as the Agricultural College of Utah. Today, Utah State enrolls approximately 28,000 students statewide offering 165 baccalaureate degrees and 138 graduate degrees. Utah State has experienced significant growth in the last five years, having an economic impact of over \$300 million in

## 2023 UAE Conference Sponsors

construction, renovation, and capital improvements across the State. With its primary campus in Logan, Utah, the Facilities department maintains over 4.7 million gross square feet of education and general space on 435 maintained acres to serve the needs of approximately 17,500 students and 2,300 faculty and staff.

The Facilities department employs around 300 FTE who provide for building maintenance and cleaning, grounds care, and construction project management. USU Facilities also delivers comprehensive utility services for nearly 7 million gross square feet on the Logan campus. The annual utility budget for campus is \$12 million with an approximate annual capital renewal of about \$3 million. Annual purchased energy commodities include, \$3.3 million electrical services statewide and \$2 million in industrial natural gas in Logan. The USU cogeneration plant in Logan produces 4.5 MW, or about 90% of USU's base electrical load, with an annual peak demand of 11.5 MW.

Steam produced through cogeneration provides heat to 90% of USU campus buildings. USU maintains underground electrical distribution systems that include redundant feed to most buildings for emergencies and maintenance outages. USU owns and maintains two electrical power substations that provide double-redundancy for the main campus. Other campus utility systems include central chilled water production and distribution, a two-million gallon chilled water storage tank, potable water and secondary water systems, storm water, and independent refuse, recycling, and surplus services.

USU energy systems, which are among the most modern and well maintained of any university campus installation, include approximately two miles of new underground walk-through service tunnels.

Utah State University was established in 1888 under the Morrill Land-Grant Colleges Act as the Agricultural College of Utah. Today, Utah State enrolls more than 28,600 students statewide offering 168 baccalaureate degrees and 143

graduate degrees. Utah State has experienced significant growth in the last five years, having an economic impact of over \$300 million in construction, renovation, and capital improvements across the State.

With its primary campus in Logan, Utah, the Facilities department maintains over four million gross square feet of academic facilities on 435 maintained acres, serving the needs of approximately 17,000 students and 2,300 faculty and staff.

The Facilities department employs around 300 FTE who provide for building maintenance and cleaning, grounds care, and construction project management. USU Facilities also delivers comprehensive utility services for six million gross square feet of the Logan campus.

The annual utility budget for campus is \$9.3 million with an approximate annual capital renewal of about \$3.0 million. Annual purchased energy commodities include, \$2.3 electrical services and \$3.6 in industrial natural gas. The USU cogeneration plant produces 4.5 MW, or about 90% of USU's base electrical load, with an annual peak demand of 11.5 MW.

Steam produced through cogeneration provides heat to 90% of USU campus buildings. USU maintains underground electrical distribution systems that include alternate feeds to most buildings for emergency or maintenance outages. USU owns and maintains two electrical power substations that provide double-redundancy for campus.

Other campus utility systems include central chilled water production and distribution, a two-million gallon chilled water storage tank, potable water and secondary water systems, storm water, and independent refuse, recycling, and surplus services.

USU energy systems, which are among the most modern and well maintained of any university campus installation, include approximately two miles of new underground walk-through service tunnels.

### **WESTERN RESOURCE ADVOCATES**

Founded in 1989, Western Resource Advocates is a regional nonprofit advocacy organization working to implement pragmatic solutions to sustain the environment, economy, and people of the West. WRA creates, advocates for, and helps implement policies that address the most pressing climate challenges in the West.

WRA's team of policy experts, scientists, economists, and attorneys has a 30-year history of working where decisions are made, sweating the details, creating evidence-based solutions, and holding decision makers accountable. From deep and scientific policy analysis to highly effective legal teams, WRA uses every tool we have to avert the worst impacts of our changing climate. This on-the-ground work advances clean energy, protects air, land, water, and wildlife, and supports resilient Western communities.

### **WHEELER POWER SYSTEMS**

Wheeler Power Systems, a subsidiary of Wheeler Machinery Company, is a trailblazer in the electric power industry, delivering unrivaled expertise and experience in standby, prime, utility power, and load management applications for over four decades. Wheeler is the authorized Caterpillar dealer in the state of Utah. With a workforce of nearly 50 full-time employees dedicated to power systems, the company has an unmatched depth of knowledge in power generation solutions. Wheeler collaborates with clients of all sizes, complexities, and requirements, providing tailored solutions for their unique energy needs. Their customers include large industrial energy users--data centers, universities, commercial businesses, health care facilities, mine sites, oil and gas fields, as well as many of the municipal and coop utilities who provide electricity to customers across the entire state of Utah. The company's extensive range of products includes diesel and gas generator sets, combined heat and power (CHP) systems, solar PV, battery energy storage systems, microgrids, uninterruptible power supplies, automatic transfer

switches, and electrical switchgear. Wheeler's offerings extend beyond the delivery of equipment to include the installation, commissioning, and lifetime maintenance of complete turnkey systems. Wheeler has a large staff of field and shop technicians with decades of experience in maintaining and maximizing the life and performance of these systems. In addition, Wheeler has long experience and deep relationships with leading engineers and contractors in the state of Utah and beyond. Wheeler is unique among CAT dealers in North America for its expertise and leadership in safety as well as in the engineering, procurement, and construction (EPC) of turnkey generation systems.
